HARSHIT TIWARI

Full Stack Web 2 | Web 3 Developer | DevOps Engineer

+91-8697020796 ht2004103@gmail.com linkedin.com/in/harshit310 github.com/HarshitTiwari-20

Summary

Full-stack developer with expertise in Next.js, TypeScript, Tailwind CSS, and high-performance systems in C++. Proven track record building decentralized Web3 applications on Solana and Stellar, along with full-stack platforms powered by MongoDB, PostgreSQL, and MySQL. Experienced in managing Linux-based DevOps pipelines, Docker containerization, automated CI/CD workflows, and low-latency microservice architectures.

Skills

Languages & Frameworks: C++, Rust, TypeScript, JavaScript (React.js, Next.js), Node.js, PHP, Tailwind CSS

Databases & Storage: MongoDB, PostgreSQL, MySQL, Redis, Schema Optimization & ORM
Web3 & Blockchain: Solana, Ethereum ,Stellar SDK, Smart Contract Development, Decentralized Finance (DeFi)
DevOps & Tools: Linux (Ubuntu) Administration, Bash Scripting, SSH, Git, CI/CD Pipelines, Microservices

Experience

Software Engineering Intern **Feb. 2026 – Present**
Project-Based Systems Development *Kolkata, WB*

- Architecting a **high-concurrency trading terminal** in **C++**, utilizing microservices to achieve sub-millisecond low-latency order execution.
- Automated **Nestjs deployment workflows** via SSH and GitHub Actions, reducing deployment overhead by over 50% and eliminating manual configuration errors.
- Fine-tuned **Linux kernel parameters** and resource allocation to enhance the scalability and throughput of containerized microservice architectures.

Freelance Web Developer **Jan. 2024 – Present**
Self-Employed *Remote*

- Developed high-performance full-stack applications using **Next.js, TypeScript, and Tailwind CSS**, delivering 100/100 Lighthouse SEO and performance scores for clients.
- Designed and implemented secure **RESTful APIs** and optimized PostgreSQL/MySQL schemas to handle high-frequency data fetching for dynamic web platforms.

Projects

Contest-Hub | Next.js, TypeScript, Node.js, Express, MongoDB, Tailwind CSS Code **April 2026**

- • Built a competitive coding platform that aggregates upcoming coding contests across major platforms in real-time.
- • Implemented efficient backend caching and optimized MongoDB queries for low-latency fetching of contest schedules and user metrics

PrepPulse | Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS Code **February 2026**

- Prep Prediction is a high-fidelity, multi-chain price prediction staking platform built for the OKX
- Deployed on X Layer Testnet, it integrates real-time authenticated OKX price feeds, a custom OKX Web3 Wallet adapter, TradingView analytics, and an autonomous Gemini AI Guard scanner to monitor rounds for bot snipers

Awards & Certifications

- **100xDevs Cohort – Harkirat Singh:** Comprehensive certification in **Web 2, Web 3, and DevOps**. Mastered advanced concepts in full-stack engineering, open-source contribution, and production-grade deployments. |
- **10+ Hackathon Participant:** Actively competed in various national and community-led hackathons, developing rapid prototypes for DeFi protocols and high-performance web applications.
- **90-Day Engineering Sprint:** Completed a rigorous self-led program focused on body-recomposition and high-performance system architecture.

Education

B.Tech in Computer Science Engineering **2023 – 2027 (Expected)**
Institute in Kolkata, West Bengal *Current Year: 4th*
